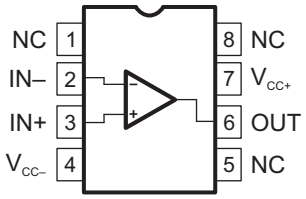
LOW-POWER SINGLE OPERATIONAL AMPLIFIER

FEATURES

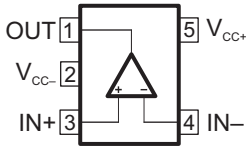
- **Wide Power-Supply Range**
  - **Single Supply…3 V to 30 V**
  - **Dual Supply…±1.5 V to ±15 V**
- **Large Output Voltage Swing… 0 V to 3.5 V (Min) (V_{CC} = 5 V)**
- **Low Supply Current…500 μA (Typ)**
- **Low Input Bias Current…20 nA (Typ)**
- **Stable With High Capacitive Loads**

D (SOIC) PACKAGE (TOP VIEW)



NC – No internal connection

DBV (SOT-23-5) PACKAGE (TOP VIEW)



DESCRIPTION/ORDERING INFORMATION

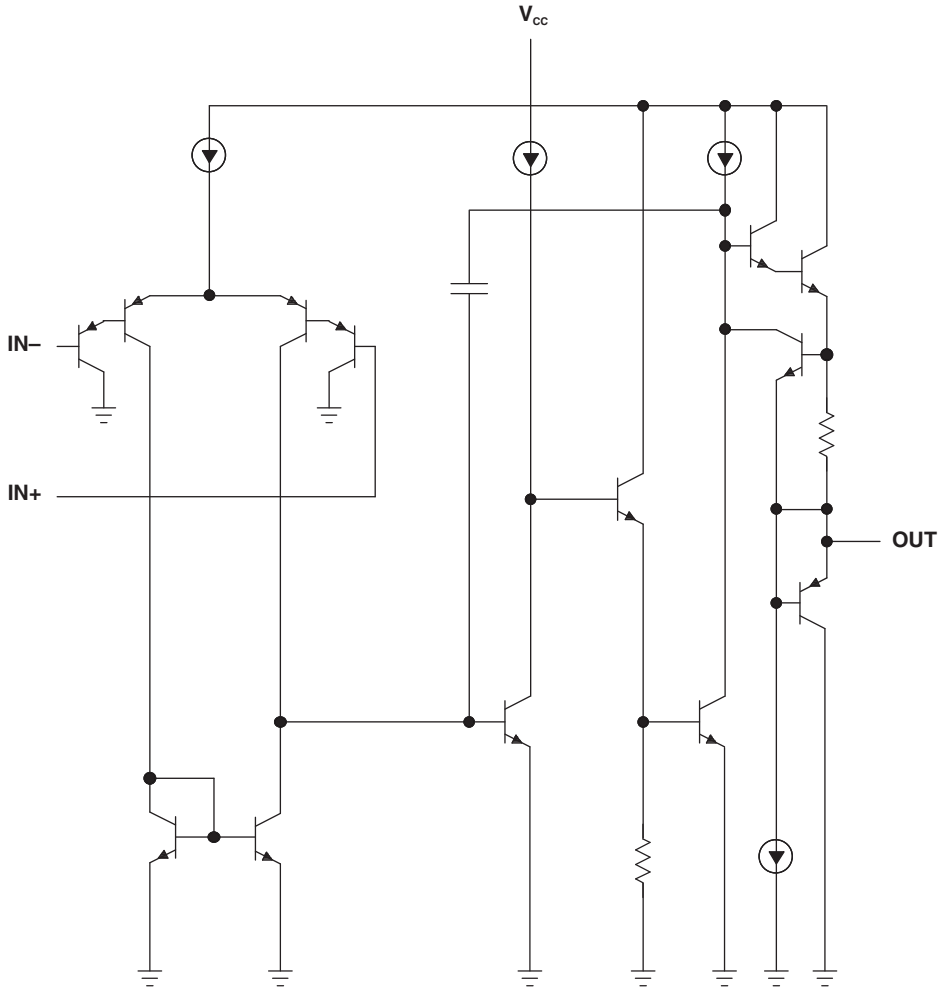
The TS321 is a bipolar operational amplifier for cost-sensitive applications in which space savings are important.

ORDERING INFORMATION

T_A	PACKAGE(1)		ORDERABLE PART NUMBER	TOP-SIDE MARKING(2)
–40°C to 125°C	SOIC – D	Tube of 75	TS321ID	SR321I
		Reel of 2500	TS321IDR	
	SOT-23-5 – DBV	Reel of 3000	TS321IDBVR	9C1_
		Reel of 250	TS321IDBVT	

(1) For the most current package and ordering information, see the Package Option Addendum at the end of this document, or see the TI website at www.ti.com.
(2) DBV: The actual top-side marking has one additional character that designates the assembly/test site.

SCHEMATIC DIAGRAM



Absolute Maximum Ratings(1)

over operating free-air temperature range (unless otherwise noted)

			MIN	MAX	UNIT
V_{CC}	Supply voltage(2)	Single		32	V
		Dual		±16	
V_{ID}	Differential input voltage(3)			32	V
V_I	Input voltage range(2)(4)		–0.3	32	V
I_I	Input current(4)			50	mA
t_{short}	Duration of output short circuit to ground			Unlimited	
θ_{JA}	Package thermal impedance, junction to free air(5)(6)	D package		97	°C/W
		DBV package		206	
T_J	Operating virtual junction temperature			150	°C
T_{stg}	Storage temperature range		–65	150	°C

(1) Stresses beyond those listed under *Absolute Maximum Ratings* may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under *Recommended Operating Conditions* is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.
(2) These voltage values are with respect to the midpoint between V_{CC+} and $V_{CC–}$.
(3) Differential voltages are at IN+ with respect to IN–.
(4) Neither input must ever be more positive than V_{CC+} or more negative than $V_{CC–}$.
(5) Maximum power dissipation is a function of $T_J(max)$, θ_{JA}, and T_A. The maximum allowable power dissipation at any allowable ambient temperature is $P_D = (T_J(max) – T_A)/\theta_{JA}$. Selecting the maximum of 150°C can affect reliability.
(6) The package thermal impedance is calculated in accordance with JESD 51-7.

Recommended Operating Conditions

			MIN	MAX	UNIT
V_{CC}	Supply voltage	Single supply	3	30	V
		Dual supply	±1.5	±15	
T_A	Operating free-air temperature		–40	125	°C

Electrical Characteristics

V_{CC+} = 5 V, V_{CC-} = GND, V_O = 1.4 V (unless otherwise noted)

PARAMETER		TEST CONDITIONS		T_A	MIN	TYP	MAX	UNIT
V_{IO}	Input offset voltage	R_S = 0, 5 V < V_{CC+} < 30 V, 0 < V_{IC} < (V_{CC+} – 1.5 V)		25°C		0.5	4	mV
				Full range			5	
I_{IO}	Input offset current			25°C		2	30	nA
				Full range			50	
I_{IB}	Input bias current(1)			25°C		20	150	nA
				Full range			200	
A_{VD}	Large-signal differential voltage amplification	V_{CC} = 15 V, R_L = 2 kΩ, V_O = 1.4 V to 11.4 V		25°C	50	100		V/mV
				Full range	25			
V_{ICR}	Common-mode input voltage(2)	V_{CC} = 30 V		25°C	0		V_{CC+} – 1.5	V
				Full range	0		V_{CC+} – 2	
V_{OH}	High-level output voltage	V_{CC} = 30 V	R_L = 2 kΩ	25°C	26	27		V
				Full range	25.5			
			R_L = 10 kΩ	25°C	27	28		
				Full range	26.5			
		V_{CC} = 5 V	R_L = 2 kΩ	25°C	3.5			
				Full range	3			
V_{OL}	Low-level output voltage	R_L = 10 kΩ		25°C		5	15	V
				Full range			20	
GBP	Gain bandwidth product	V_{CC} = 30 V, V_I = 10 mV, R_L = 2 kΩ, f = 100 kHz, C_L = 100 pF		25°C		0.8		MHz
SR	Slew rate	V_{CC} = 15 V, V_I = 0.5 V to 3 V, R_L = 2 kΩ, C_L = 100 pF, unity gain		25°C		0.4		V/µs
ϕ_m	Phase margin			25°C		60		°
CMRR	Common-mode rejection ratio	R_S ≤ 10 kΩ		25°C	65	85		dB
I_{SOURCE}	Output source current	V_{CC} = 15 V, V_O = 2 V, V_{ID} = 1 V		25°C	20	40		mA
I_{SINK}	Output sink current	V_{CC} = 15 V, V_{ID} = 1 V	V_O = 2 V	25°C	10	20		mA
			V_O = 0.2 V	25°C	12	50		µA
I_O	Short-circuit to GND	V_{CC} = 15 V		25°C		40	60	mA
SVR	Supply-voltage rejection ratio	V_{CC} = 5 V to 30 V		25°C	65	110		dB
I_{CC}	Total supply current	No load	V_{CC} = 5 V	25°C		500	800	µA
			V_{CC} = 30 V			600	900	
			V_{CC} = 5 V	Full range		600	900	
			V_{CC} = 30 V				1000	
THD	Total harmonic distortion	V_{CC} = 30 V, V_O = 2 V_{pp}, A_V = 20 dB, R_L = 2 kΩ, f = 1 kHz, C_L = 100 pF		25°C		0.015		%
e_N	Equivalent input noise voltage	V_{CC} = 30 V, f = 1 kHz, R_S = 100 Ω		25°C		50		nV/√Hz

(1) The direction of the input current is out of the device. This current essentially is constant, independent of the state of the output, so no loading change exists on the input lines.

(2) The input common-mode voltage of either input signal should not be allowed to go negative by more than 0.3 V. The upper end of the common-mode voltage range is V_{CC+} – 1.5 V, but either or both inputs can go to 32 V without damage.

PACKAGING INFORMATION

(1) The marketing status values are defined as follows:
ACTIVE: Product device recommended for new designs.
LIFEBUY: TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.
NRND: Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.
PREVIEW: Device has been announced but is not in production. Samples may or may not be available.
OBSOLETE: TI has discontinued the production of the device.

(2) Eco Plan - The planned eco-friendly classification: Pb-Free (RoHS), Pb-Free (RoHS Exempt), or Green (RoHS & no Sb/Br) - please check http://www.ti.com/productcontent for the latest availability information and additional product content details.
TBD: The Pb-Free/Green conversion plan has not been defined.

Pb-Free (RoHS): TI's terms "Lead-Free" or "Pb-Free" mean semiconductor products that are compatible with the current RoHS requirements for all 6 substances, including the requirement that lead not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, TI Pb-Free products are suitable for use in specified lead-free processes.
Pb-Free (RoHS Exempt): This component has a RoHS exemption for either 1) lead-based flip-chip solder bumps used between the die and package, or 2) lead-based die adhesive used between the die and leadframe. The component is otherwise considered Pb-Free (RoHS compatible) as defined above.
Green (RoHS & no Sb/Br): TI defines "Green" to mean Pb-Free (RoHS compatible), and free of Bromine (Br) and Antimony (Sb) based flame retardants (Br or Sb do not exceed 0.1% by weight in homogeneous material)

(3) MSL, Peak Temp. -- The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

(4) Multiple Top-Side Markings will be inside parentheses. Only one Top-Side Marking contained in parentheses and separated by a "~" will appear on a device. If a line is indented then it is a continuation of the previous line and the two combined represent the entire Top-Side Marking for that device.

OTHER QUALIFIED VERSIONS OF TS321 :

- Automotive: TS321-Q1

NOTE: Qualified Version Definitions:

- Automotive - Q100 devices qualified for high-reliability automotive applications targeting zero defects

TAPE AND REEL INFORMATION

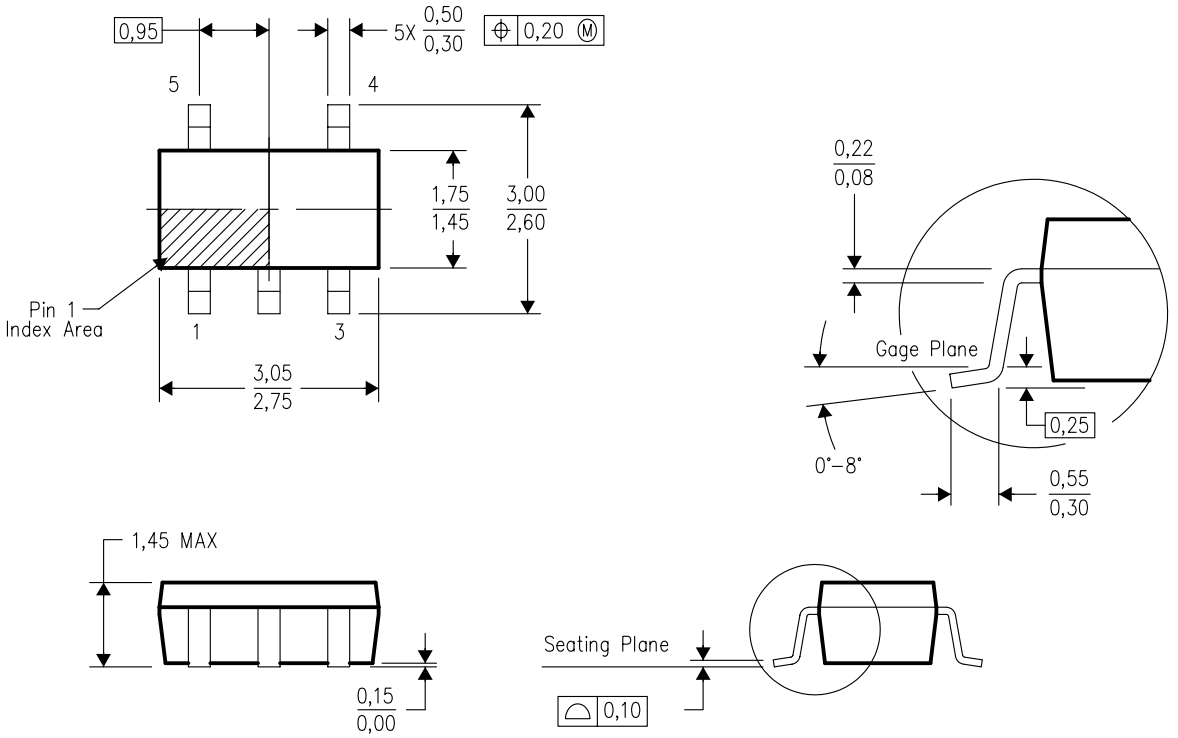
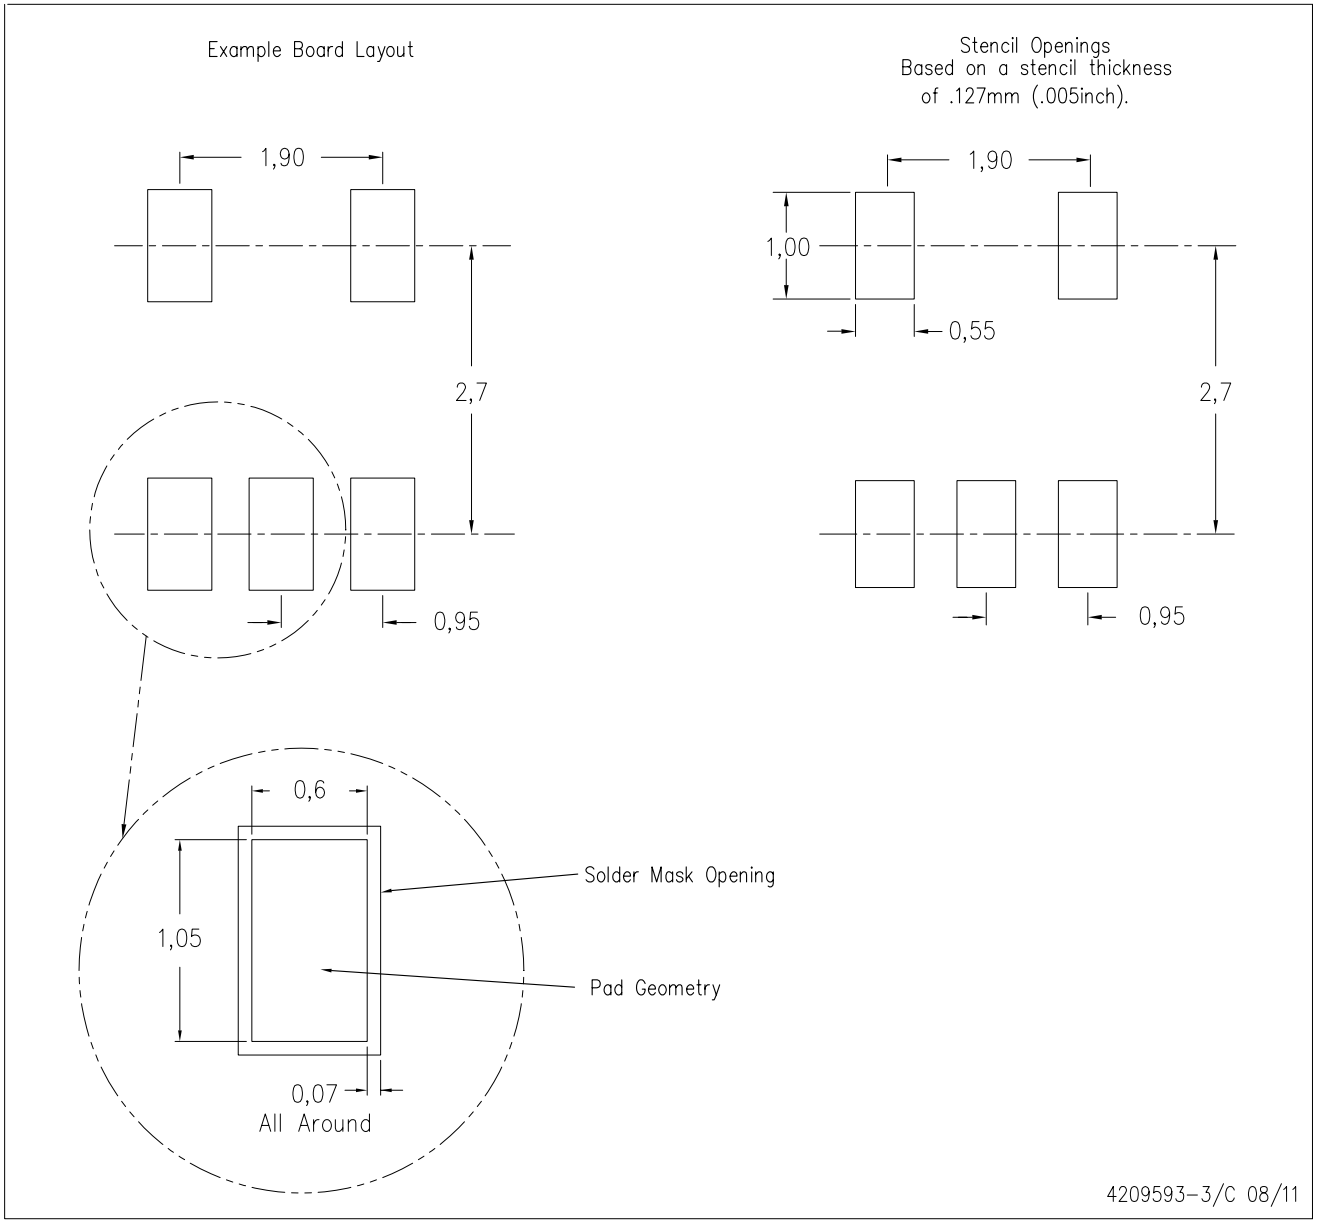
DBV (R–PDSO–G5) PLASTIC SMALL–OUTLINE PACKAGE



4073253–4/K 03/2006

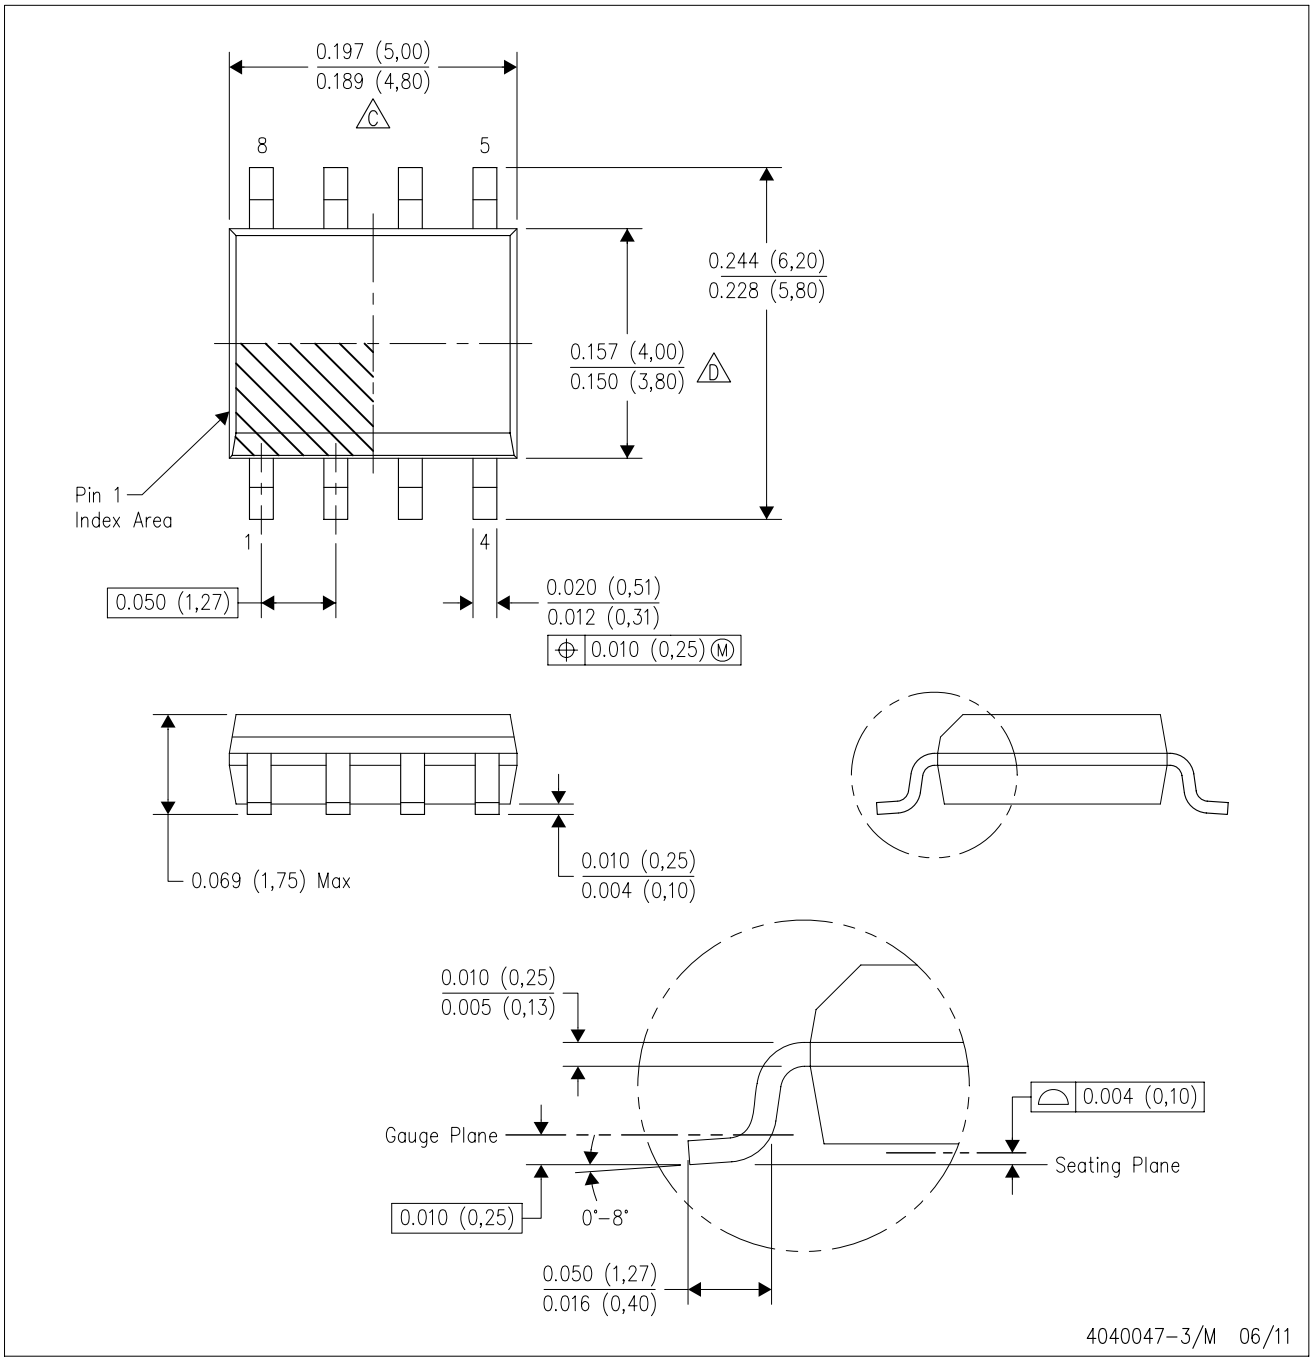
NOTES:
A. All linear dimensions are in millimeters.
B. This drawing is subject to change without notice.
C. Body dimensions do not include mold flash or protrusion. Mold flash and protrusion shall not exceed 0.15 per side.
D. Falls within JEDEC MO–178 Variation AA.

DBV (R–PDSO–G5) PLASTIC SMALL OUTLINE



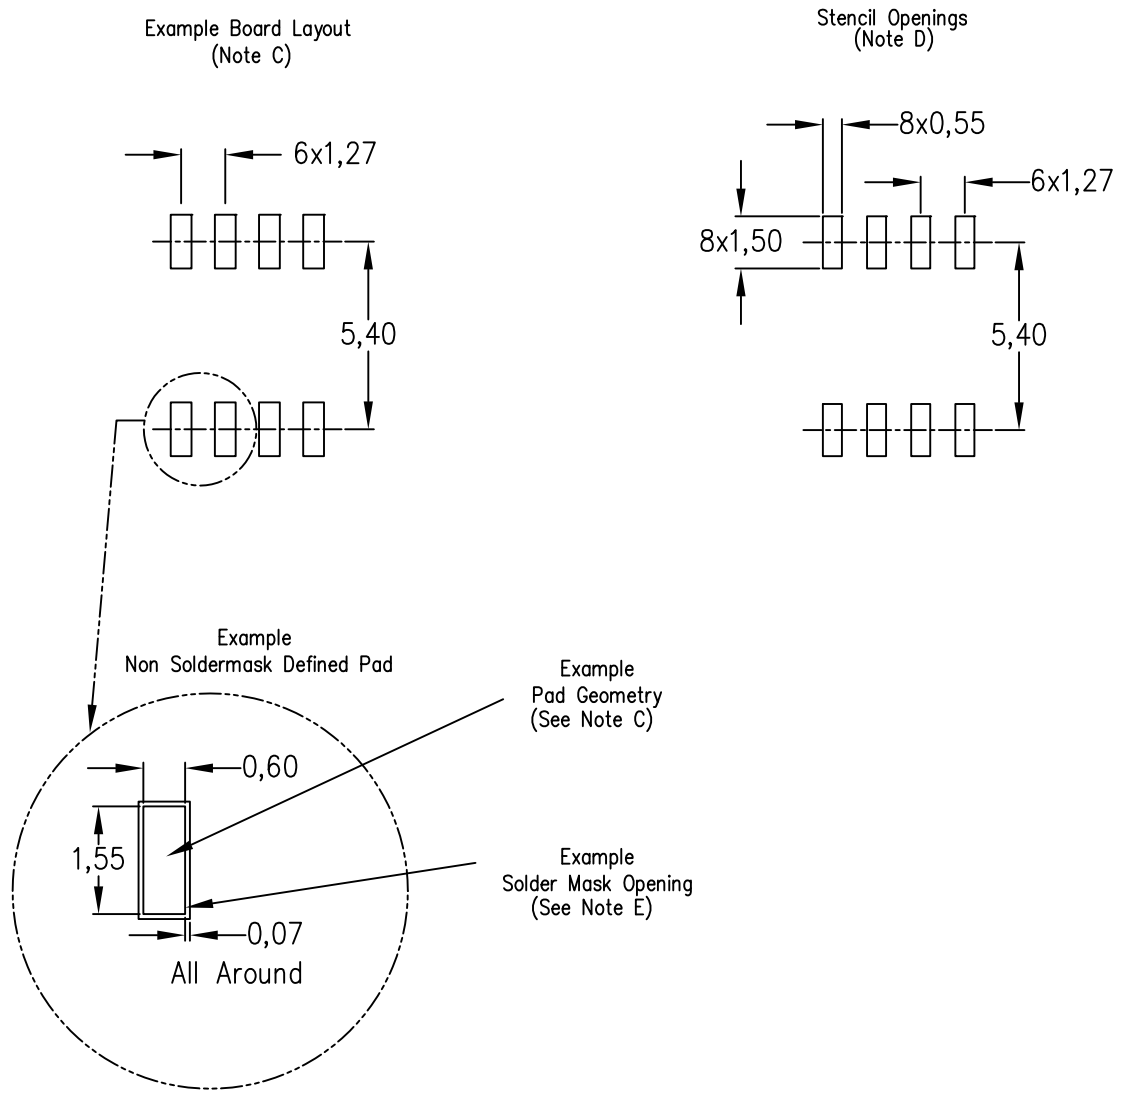
NOTES:
A. All linear dimensions are in millimeters.
B. This drawing is subject to change without notice.
C. Customers should place a note on the circuit board fabrication drawing not to alter the center solder mask defined pad.
D. Publication IPC–7351 is recommended for alternate designs.
E. Laser cutting apertures with trapezoidal walls and also rounding corners will offer better paste release. Customers should contact their board assembly site for stencil design recommendations. Example stencil design based on a 50% volumetric metal load solder paste. Refer to IPC–7525 for other stencil recommendations.

D (R–PDSO–G8) PLASTIC SMALL OUTLINE



NOTES:
A. All linear dimensions are in inches (millimeters).
B. This drawing is subject to change without notice.
C. Body length does not include mold flash, protrusions, or gate burrs. Mold flash, protrusions, or gate burrs shall not exceed 0.006 (0,15) each side.
D. Body width does not include interlead flash. Interlead flash shall not exceed 0.017 (0,43) each side.
E. Reference JEDEC MS–012 variation AA.

D (R–PDSO–G8) PLASTIC SMALL OUTLINE



NOTES:
A. All linear dimensions are in millimeters.
B. This drawing is subject to change without notice.
C. Publication IPC–7351 is recommended for alternate designs.
D. Laser cutting apertures with trapezoidal walls and also rounding corners will offer better paste release. Customers should contact their board assembly site for stencil design recommendations. Refer to IPC–7525 for other stencil recommendations.
E. Customers should contact their board fabrication site for solder mask tolerances between and around signal pads.

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, enhancements, improvements and other changes to its semiconductor products and services per JESD46, latest issue, and to discontinue any product or service per JESD48, latest issue. Buyers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All semiconductor products (also referred to herein as “components”) are sold subject to TI’s terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its components to the specifications applicable at the time of sale, in accordance with the warranty in TI’s terms and conditions of sale of semiconductor products. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by applicable law, testing of all parameters of each component is not necessarily performed.

TI assumes no liability for applications assistance or the design of Buyers’ products. Buyers are responsible for their products and applications using TI components. To minimize the risks associated with Buyers’ products and applications, Buyers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any patent right, copyright, mask work right, or other intellectual property right relating to any combination, machine, or process in which TI components or services are used. Information published by TI regarding third-party products or services does not constitute a license to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of significant portions of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI components or services with statements different from or beyond the parameters stated by TI for that component or service voids all express and any implied warranties for the associated TI component or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

Buyer acknowledges and agrees that it is solely responsible for compliance with all legal, regulatory and safety-related requirements concerning its products, and any use of TI components in its applications, notwithstanding any applications-related information or support that may be provided by TI. Buyer represents and agrees that it has all the necessary expertise to create and implement safeguards which anticipate dangerous consequences of failures, monitor failures and their consequences, lessen the likelihood of failures that might cause harm and take appropriate remedial actions. Buyer will fully indemnify TI and its representatives against any damages arising out of the use of any TI components in safety-critical applications.

In some cases, TI components may be promoted specifically to facilitate safety-related applications. With such components, TI’s goal is to help enable customers to design and create their own end-product solutions that meet applicable functional safety standards and requirements. Nonetheless, such components are subject to these terms.

No TI components are authorized for use in FDA Class III (or similar life-critical medical equipment) unless authorized officers of the parties have executed a special agreement specifically governing such use.

Only those TI components which TI has specifically designated as military grade or “enhanced plastic” are designed and intended for use in military/aerospace applications or environments. Buyer acknowledges and agrees that any military or aerospace use of TI components which have ***not*** been so designated is solely at the Buyer's risk, and that Buyer is solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI has specifically designated certain components as meeting ISO/TS16949 requirements, mainly for automotive use. In any case of use of non-designated products, TI will not be responsible for any failure to meet ISO/TS16949.
