LM98722 3 Channel, 16-Bit, 45 MSPS Analog Front End with LVDS/CMOS Output, Integrated CCD/CIS Sensor Timing Generator and Spread Spectrum Clock Generation

Check for Samples: LM98722

FEATURES

- **LVDS/CMOS Outputs**
- **LVDS/CMOS/Crystal Clock Source with PLL Multiplication**
- **Integrated Flexible Spread Spectrum Clock Generation**
- **CDS or S/H Processing for CCD or CIS sensors**
- **Independent Gain/Offset Correction for Each Channel**
- **Automatic per-Channel Gain and Offset Calibration**
- **Programmable Input Clamp Voltage**
- **Flexible CCD/CIS Sensor Timing Generator**

KEY SPECIFICATIONS

- **Maximum Input Level:**
  - **1.2 or 2.4 Volt Modes**
  - **(both with + or - polarity option)**
- **ADC Resolution: 16-Bit**
- **ADC Sampling Rate: 45 MSPS**
- **INL: +18/-25 LSB (typ)**
- **Channel Sampling Rate: 22.5/22.5/15 MSPS**
- **PGA Gain Steps: 256 Steps**
- **PGA Gain Range: 0.64 to 8.3x**
- **Analog DAC Resolution: +/-9 Bits**
- **Analog DAC Range: +/-307mV or +/-614mV**
- **Digital DAC Resolution: +/-6 Bits**
- **Digital DAC Range: -2048 LSB to + 2016 LSB**
- **SNR: -74dB (@0dB PGA Gain)**
- **Power Dissipation: 630mW (LVDS)**
- **Operating Temp: 0 to 70°C**
- **Supply Voltage: 3.3V Nominal (3.0V to 3.6V range)**

APPLICATIONS

- **Multi-Function Peripherals**
- **High-speed Currency/Check Scanners**
- **Flatbed or Handheld Color Scanners**
- **High-speed Document Scanners**

DESCRIPTION

The LM98722 is a fully integrated, high performance 16-Bit, 45 MSPS signal processing solution for digital color copiers, scanners, and other image processing applications. High-speed signal throughput is achieved with an innovative architecture utilizing Correlated Double Sampling (CDS), typically employed with CCD arrays, or Sample and Hold (S/H) inputs (for higher speed CCD or CMOS image sensors). The signal paths utilize 8 bit Programmable Gain Amplifiers (PGA), a +/-9-Bit offset correction DAC and independently controlled Digital Black Level correction loops for each input. The PGA and offset DAC are programmed independently allowing unique values of gain and offset for each of the three analog inputs. The signals are then routed to a 45MHz high performance analog-to-digital converter (ADC). The fully differential processing channel shows exceptional noise immunity, having a very low noise floor of -74dB. The 16-bit ADC has excellent dynamic performance making the LM98722 transparent in the image reproduction chain.

A very flexible integrated Spread Spectrum Clock Generation (SSCG) modulator is included to assist with EM compliance and reduce system costs.

Pin Descriptions[1]

Pin	Name	I/O	Typ	Res	Description
1	PHIC2	O	D	PU	Configurable high speed sensor timing output.
2	PHIC1	O	D	PD	Configurable high speed sensor timing output.
3	SH1	O	D	PU	Configurable low speed sensor timing output.
4	CE	I	D		Chip Serial Interface Address Setting Input
					CE Level / **Address**
					V_D / 01
					Float / 10
					DGND / 00
5	CAL	I	D	PD	Initiate calibration sequence. Leave unconnected or tie to DGND if unused.
6	$\overline{\text{RESET}}$	I	D	PU	Active-low master reset. NC when function not being used.
7	SH_R	I	D	PD	External request for an SH interval.
8	SDI	I	D	PD	Serial Interface Data Input.
9	SDO	O	D		Serial Interface Data Output.
10	SCLK	I	D	PD	Serial Interface shift register clock.
11	$\overline{\text{SEN}}$	I	D	PU	Active-low chip enable for the Serial Interface.
12	V_A		P		Analog power supply. Bypass voltage source with 4.7µF and pin with 0.1µF to AGND.
13	AGND		P		Analog ground return.
14	V_A		P		Analog power supply. Bypass voltage source with 4.7µF and pin with 0.1µF to AGND.
15	VREFB	O	A		Bottom of ADC reference. Bypass with a 0.1µF capacitor to ground.
16	VREFT	O	A		Top of ADC reference. Bypass with a 0.1µF capacitor to ground.
17	V_A		P		Analog power supply. Bypass voltage source with 4.7µF and pin with 0.1µF to AGND.
18	AGND		P		Analog ground return.
19	VCLP	IO	A		Input Clamp Voltage. Normally bypassed with a 0.1µF , and a 4.7µF capacitor to AGND. An external reference voltage may be applied to this pin.
20	V_A		P		Analog power supply. Bypass voltage source with 4.7µF and pin with 0.1µF to AGND.
21	IBIAS	O	A		Bias setting pin. Connect a 9.0 kOhm 1% resistor to AGND.
22	AGND		P		Analog ground return.
23	OS_R	I	A		Analog input signal. Typically sensor Red output AC-coupled thru a capacitor.
24	AGND		P		Analog ground return.
25	OS_G	I	A		Analog input signal. Typically sensor Green output AC-coupled thru a capacitor.
26	AGND		P		Analog ground return.
27	OS_B	I	A		Analog input signal. Typically sensor Blue output AC-coupled thru a capacitor.
28	CPOFILT2		A		Charge Pump Filter Capacitor. Bypass this supply pin with a 0.1µF capacitor to CPOFILT1.
29	DGND		P		Digital ground return.
30	CPOFILT1		A		Charge Pump Filter Capacitor. Bypass this supply pin with a 0.1µF capacitor to CPOFILT2.
31	DVB	O	D		Digital Core Voltage bypass. Not an input. Bypass with 0.1µF capacitor to DGND.
32	INCLK+	I	D		Clock Input. Non-Inverting input for LVDS clocks or CMOS clock input. CMOS clock is selected when pin 29 is held at DGND, otherwise clock is configured for LVDS operation.
33	INCLK-	I	D		Clock Input. Inverting input for LVDS clocks, connect to DGND for CMOS clock.
34	DOUT7/ TXCLK+	O	D		Bit 7 of the digital video output bus in CMOS Mode, LVDS Frame Clock+ in LVDS Mode.
35	DOUT6/ TXCLK-	O	D		Bit 6 of the digital video output bus in CMOS Mode, LVDS Frame Clock- in LVDS Mode.
36	DOUT5/ TXOUT2+	O	D		Bit 5 of the digital video output bus in CMOS Mode, LVDS Data Out2+ in LVDS Mode.

(1) (I=Input), (O=Output), (IO=Bi-directional), (P=Power), (D=Digital), (A=Analog), (PU=Pull Up with an internal resistor), (PD=Pull Down with an internal resistor.).

Pin Descriptions[1] (continued)

Pin	Name	I/O	Typ	Res	Description
37	DOUT4/ TXOUT2-	O	D		Bit 4 of the digital video output bus in CMOS Mode, LVDS Data Out2- in LVDS Mode.
38	DOUT3/ TXOUT1+	O	D		Bit 3 of the digital video output bus in CMOS Mode, LVDS Data Out1+ in LVDS Mode.
39	DOUT2/ TXOUT1-	O	D		Bit 2 of the digital video output bus in CMOS Mode, LVDS Data Out1- in LVDS Mode.
40	DOUT1/ TXOUT0+	O	D		Bit 1 of the digital video output bus in CMOS Mode, LVDS Data Out0+ in LVDS Mode.
41	DOUT0/ TXOUT0-	O	D		Bit 0 of the digital video output bus in CMOS Mode, LVDS Data Out0- in LVDS Mode.
42	DGND	O	D	PD	Configurable sensor control output.
43	V_D		P		Power supply for the digital circuits. Bypass this supply pin with 0.1µF capacitor. A single 4.7µF capacitor should be used between the supply and the VD, VR and VC pins.
44	V_C		P		Power supply for the sensor control outputs. Bypass this supply pin with 0.1µF capacitor.
45	CLKOUT/SH2	O	D		Output clock for registering output data when using CMOS outputs, or a configurable low speed sensor timing output.
46	SH3	O	D		Configurable low speed sensor timing output.
47	RS	O	D		Configurable high speed sensor timing output.
48	CP	O	D		Configurable high speed sensor timing output.
49	PHIA1	O	D		Configurable high speed sensor timing output.
50	PHIA2	O	D		Configurable high speed sensor timing output.
51	DGND		P		Digital ground return.
52	V_C		P		Power supply for the sensor control outputs. Bypass this supply pin with 0.1µF capacitor.
53	PHIB1	O	D		Configurable high speed sensor timing output.
54	PHIB2	O	D		Configurable high speed sensor timing output.
55	SH4	O	D		Configurable low speed sensor timing output.
56	SH5	O	D		Configurable low speed sensor timing output.

These devices have limited built-in ESD protection. The leads should be shorted together or the device placed in conductive foam during storage or handling to prevent electrostatic damage to the MOS gates.

Absolute Maximum Ratings (1)(2)(3)

Supply Voltage (VA,VR,VD,VC)		4.2V
Voltage on Any Input Pin(Not to exceed 4.2V)		−0.3V to (VA + 0.3V)
Voltage on Any Output Pin(execpt DVB and not to exceed 4.2V)		−0.3V to (VA + 0.3V)
DVB Output Pin Voltage		2.0V
Input Current at any pin other than Supply Pins (4)		±25 mA
Package Input Current (except Supply Pins) (4)		±50 mA
Maximum Junction Temperature (TA)		150°C
Thermal Resistance (θ_{JA})		<66°C/W
Package Dissipation at T_A = 25°C (5)		>1.89W
ESD Rating (6)	Human Body Model	2500V
	Machine Model	250V
Storage Temperature		−65°C to +150°C
Soldering process must comply with Texas Instrument's Reflow Temperature Profile specifications. Refer to www.ti.com/packaging (7)		

(1) Absolute Maximum Ratings indicate limits beyond which damage to the device may occur. Operating Ratings indicate conditions for which the device is functional, but do not ensure specific performance limits. For ensured specifications and test conditions, see the Electrical Characteristics. The ensured specifications apply only for the test conditions listed. Some performance characteristics may degrade when the device is not operated under the listed test conditions. Operation of the device beyond the Operating Ratings is not recommended.
(2) All voltages are measured with respect to AGND = DGND = 0V, unless otherwise specified.
(3) If Military/Aerospace specified devices are required, please contact the Texas Instruments Sales Office/ Distributors for availability and specifications.
(4) When the input voltage (V_{IN}) at any pin exceeds the power supplies (V_{IN} < GND or V_{IN} > V_A or V_D), the current at that pin should be limited to 25 mA. The 50 mA maximum package input current rating limits the number of pins that can simultaneously safely exceed the power supplies with an input current of 25 mA to two.
(5) The maximum power dissipation must be derated at elevated temperatures and is dictated by T_{JMAX}, θ_{JA} and the ambient temperature, T_A. The maximum allowable power dissipation at any temperature is $P_D = (T_{JMAX} – T_A)/\theta_{JA}$. The values for maximum power dissipation listed above will be reached only when the device is operated in a severe fault condition (e.g. when input or output pins are driven beyond the power supply voltages, or the power supply polarity is reversed). Such conditions should always be avoided.
(6) Human body model is 100 pF capacitor discharged through a 1.5 kΩ resistor. Machine model is 220 pF discharged through 0Ω.
(7) Reflow temperature profiles are different for lead-free and non-lead-free packages.

Operating Ratings (1)(2)

Operating Temperature Range	0°C ≤ T_A ≤ +70°C
All Supply Voltage	+3.0V to +3.6V

(1) Absolute Maximum Ratings indicate limits beyond which damage to the device may occur. Operating Ratings indicate conditions for which the device is functional, but do not ensure specific performance limits. For ensured specifications and test conditions, see the Electrical Characteristics. The ensured specifications apply only for the test conditions listed. Some performance characteristics may degrade when the device is not operated under the listed test conditions. Operation of the device beyond the Operating Ratings is not recommended.
(2) All voltages are measured with respect to AGND = DGND = 0V, unless otherwise specified.

Electrical Characteristics

The following specifications apply for VA = VD = VC = 3.3V, C_L = 10pF, and f_{INCLK} = 15MHz unless otherwise specified. **Boldface limits apply for $T_A = T_{MIN}$ to T_{MAX};** all other limits T_A = 25°C.

Parameter		Test Conditions	Min (1)	Typ (2)	Max (1) (3)	Units

V_{IHL}	Differential LVDS Clock High Threshold Voltage	R_L = 100Ω V_{CM} (LVDS Input Common Mode Voltage)= 1.25V			200	mV
V_{ILL}	Differential LVDS Clock Low Threshold Voltage		-200			mV
V_{IHC}	CMOS Clock High Threshold Voltage	INCLK- = DGND	2.0			V
V_{ILC}	CMOS Clock Low Threshold Voltage				0.8	V
I_{IHL}	CMOS Clock Input High Current			230	260	µA
I_{ILC}	CMOS Clock Input Low Current		-135	-120		µA

(1) Test limits are ensured to TI's AOQL (Average Outgoing Quality Level).
(2) Typical figures are at T_A = 25°C, and represent most likely parametric norms at the time of product characterization. The typical specifications are not ensured.
(3) The analog inputs are protected as shown in Figure 4. Input voltage magnitudes beyond the supply rails will not damage the device, provided the current is limited per Note 4 under the Absolute Maximum Ratings Table. However, input errors will be generated If the input goes above VA and below AGND.

Electrical Characteristics (continued)

The following specifications apply for VA = VD = VC = 3.3V, C_L = 10pF, and f_{INCLK} = 15MHz unless otherwise specified. **Boldface limits apply for $T_A = T_{MIN}$ to T_{MAX};** all other limits T_A = 25°C.

t_{HZ}	Data Output to High Z				0.5	T_{SCLK}

(4) If the input INCLK is divided down to a lower internal clock rate via the PLL, the parameter t_{SENW} will be increased by the same factor.
(5) When the Spread Spectrum Clock Generation feature is enabled, t_{SENW} should be increased by 1.

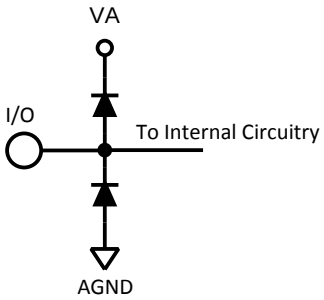

Figure 4.

REVISION HISTORY

Changes from Original (April 2013) to Revision A	Page
• Changed layout of National Data Sheet to TI format	13

PACKAGING INFORMATION

Orderable Device	Status (1)	Package Type	Package Drawing	Pins	Package Qty	Eco Plan (2)	Lead/Ball Finish	MSL Peak Temp (3)	Op Temp (°C)	Top-Side Markings (4)	Samples
LM98722CCMT/NOPB	ACTIVE	TSSOP	DGG	56	34	Green (RoHS & no Sb/Br)	CU SN	Level-2-260C-1 YEAR	0 to 70	LM98722CCMT	Samples
LM98722CCMTX/NOPB	ACTIVE	TSSOP	DGG	56	1000	Green (RoHS & no Sb/Br)	CU SN	Level-2-260C-1 YEAR	0 to 70	LM98722CCMT	Samples

(1) The marketing status values are defined as follows:
ACTIVE: Product device recommended for new designs.
LIFEBUY: TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.
NRND: Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.
PREVIEW: Device has been announced but is not in production. Samples may or may not be available.
OBSOLETE: TI has discontinued the production of the device.

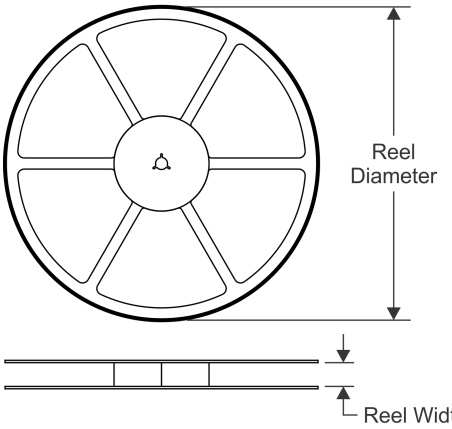
(2) Eco Plan - The planned eco-friendly classification: Pb-Free (RoHS), Pb-Free (RoHS Exempt), or Green (RoHS & no Sb/Br) - please check http://www.ti.com/productcontent for the latest availability information and additional product content details.
TBD: The Pb-Free/Green conversion plan has not been defined.
Pb-Free (RoHS): TI's terms "Lead-Free" or "Pb-Free" mean semiconductor products that are compatible with the current RoHS requirements for all 6 substances, including the requirement that lead not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, TI Pb-Free products are suitable for use in specified lead-free processes.
Pb-Free (RoHS Exempt): This component has a RoHS exemption for either 1) lead-based flip-chip solder bumps used between the die and package, or 2) lead-based die adhesive used between the die and leadframe. The component is otherwise considered Pb-Free (RoHS compatible) as defined above.
Green (RoHS & no Sb/Br): TI defines "Green" to mean Pb-Free (RoHS compatible), and free of Bromine (Br) and Antimony (Sb) based flame retardants (Br or Sb do not exceed 0.1% by weight in homogeneous material)

(3) MSL, Peak Temp. -- The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

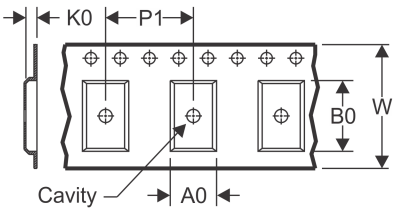
(4) Multiple Top-Side Markings will be inside parentheses. Only one Top-Side Marking contained in parentheses and separated by a "~" will appear on a device. If a line is indented then it is a continuation of the previous line and the two combined represent the entire Top-Side Marking for that device.

TAPE AND REEL INFORMATION

REEL DIMENSIONS

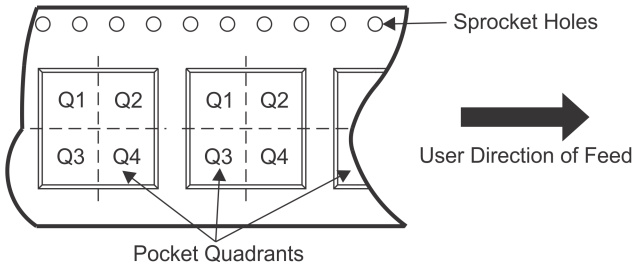


TAPE DIMENSIONS



A0	Dimension designed to accommodate the component width
B0	Dimension designed to accommodate the component length
K0	Dimension designed to accommodate the component thickness
W	Overall width of the carrier tape
P1	Pitch between successive cavity centers

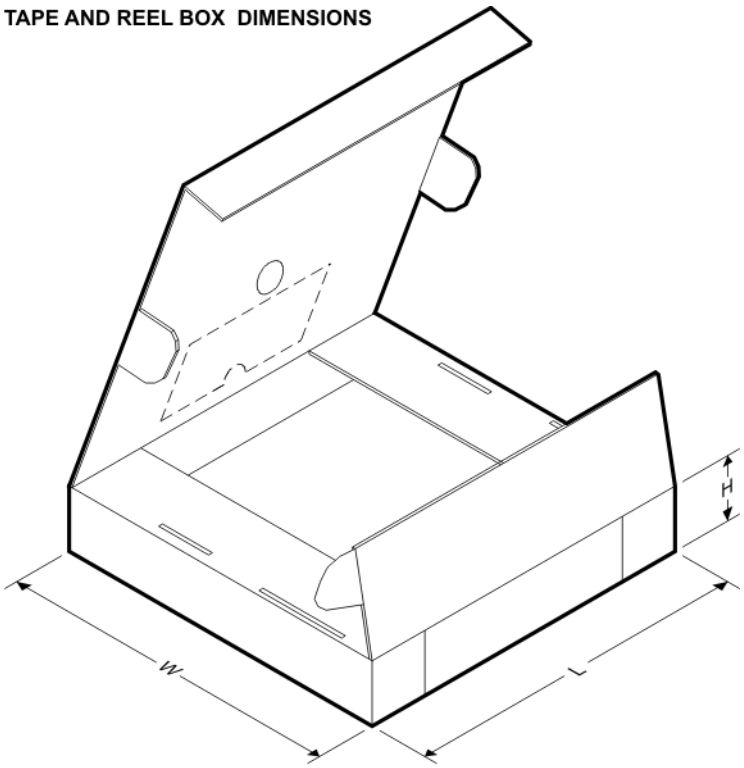
QUADRANT ASSIGNMENTS FOR PIN 1 ORIENTATION IN TAPE



*All dimensions are nominal

Device	Package Type	Package Drawing	Pins	SPQ	Reel Diameter (mm)	Reel Width W1 (mm)	A0 (mm)	B0 (mm)	K0 (mm)	P1 (mm)	W (mm)	Pin1 Quadrant
LM98722CCMTX/NOPB	TSSOP	DGG	56	1000	330.0	24.4	8.6	14.5	1.8	12.0	24.0	Q1

TAPE AND REEL BOX DIMENSIONS

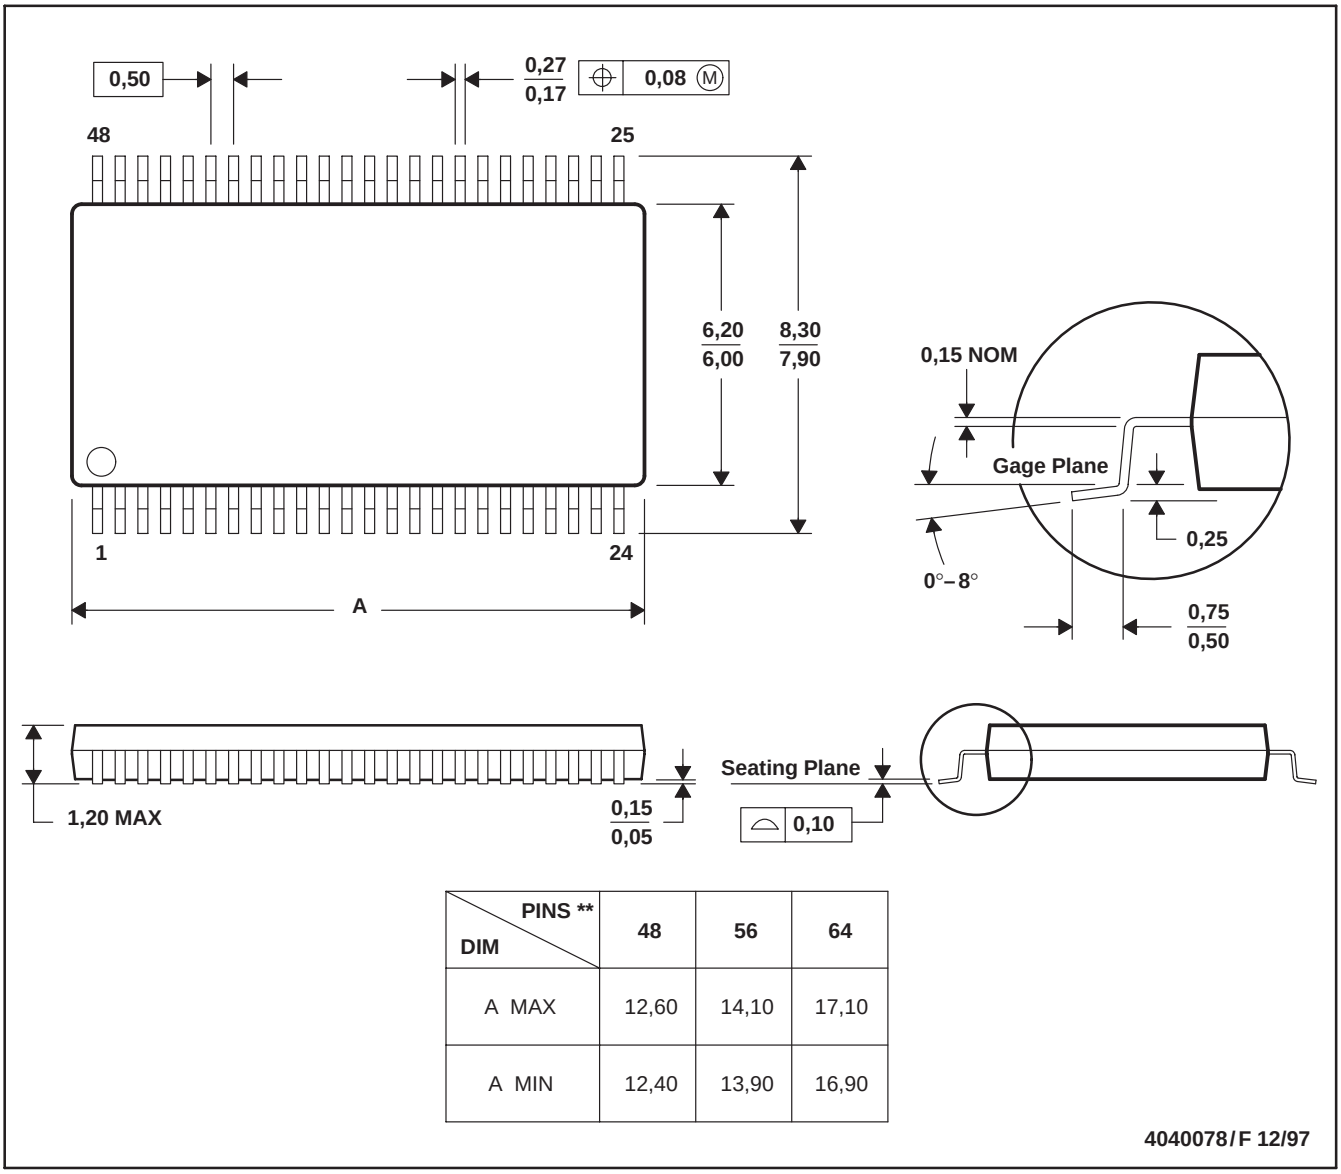


*All dimensions are nominal

Device	Package Type	Package Drawing	Pins	SPQ	Length (mm)	Width (mm)	Height (mm)
LM98722CCMTX/NOPB	TSSOP	DGG	56	1000	367.0	367.0	45.0

DGG (R-PDSO-G)** **PLASTIC SMALL-OUTLINE PACKAGE**

48 PINS SHOWN



DIM \ PINS **	48	56	64
A MAX	12,60	14,10	17,10
A MIN	12,40	13,90	16,90

NOTES: A. All linear dimensions are in millimeters.
B. This drawing is subject to change without notice.
C. Body dimensions do not include mold protrusion not to exceed 0,15.
D. Falls within JEDEC MO-153

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, enhancements, improvements and other changes to its semiconductor products and services per JESD46, latest issue, and to discontinue any product or service per JESD48, latest issue. Buyers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All semiconductor products (also referred to herein as “components”) are sold subject to TI’s terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its components to the specifications applicable at the time of sale, in accordance with the warranty in TI’s terms and conditions of sale of semiconductor products. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by applicable law, testing of all parameters of each component is not necessarily performed.

TI assumes no liability for applications assistance or the design of Buyers’ products. Buyers are responsible for their products and applications using TI components. To minimize the risks associated with Buyers’ products and applications, Buyers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any patent right, copyright, mask work right, or other intellectual property right relating to any combination, machine, or process in which TI components or services are used. Information published by TI regarding third-party products or services does not constitute a license to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of significant portions of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI components or services with statements different from or beyond the parameters stated by TI for that component or service voids all express and any implied warranties for the associated TI component or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

Buyer acknowledges and agrees that it is solely responsible for compliance with all legal, regulatory and safety-related requirements concerning its products, and any use of TI components in its applications, notwithstanding any applications-related information or support that may be provided by TI. Buyer represents and agrees that it has all the necessary expertise to create and implement safeguards which anticipate dangerous consequences of failures, monitor failures and their consequences, lessen the likelihood of failures that might cause harm and take appropriate remedial actions. Buyer will fully indemnify TI and its representatives against any damages arising out of the use of any TI components in safety-critical applications.

In some cases, TI components may be promoted specifically to facilitate safety-related applications. With such components, TI’s goal is to help enable customers to design and create their own end-product solutions that meet applicable functional safety standards and requirements. Nonetheless, such components are subject to these terms.

No TI components are authorized for use in FDA Class III (or similar life-critical medical equipment) unless authorized officers of the parties have executed a special agreement specifically governing such use.

Only those TI components which TI has specifically designated as military grade or “enhanced plastic” are designed and intended for use in military/aerospace applications or environments. Buyer acknowledges and agrees that any military or aerospace use of TI components which have ***not*** been so designated is solely at the Buyer's risk, and that Buyer is solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI has specifically designated certain components as meeting ISO/TS16949 requirements, mainly for automotive use. In any case of use of non-designated products, TI will not be responsible for any failure to meet ISO/TS16949.
