

DS34LV87T Enhanced CMOS Quad Differential Line Driver

Check for Samples: [DS34LV87T](#)

FEATURES

- Meets TIA/EIA-422-B (RS-422) and ITU-T V.11 Recommendation
- Interoperable With Existing 5V RS-422 Networks
- Ensured V_{OD} of 2V Min Over Operating Conditions
- Balanced Output Crossover for Low EMI (Typical Within 40 mV of 50% Voltage Level)
- Low Power Design (330 μ W @ 3.3V Static)
- ESD \geq 7 kV on Cable I/O Pins (HBM)
- Industrial Temperature Range
- Ensured AC Parameter:
 - Maximum Driver Skew: 2 ns
 - Maximum Transition Time: 10 ns
- Pin Compatible With DS26C31
- Available in SOIC Packaging

DESCRIPTION

The DS34LV87T is a high speed quad differential CMOS driver that meets the requirements of both TIA/EIA-422-B and ITU-T V.11. The CMOS DS34LV87T features low static I_{CC} of 100 μ A max which makes it ideal for battery powered and power conscious applications. The TRI-STATE enable, EN, allows the device to be disabled when the device is not in use to minimize power. The dual enable scheme allows for flexibility in turning devices on or off.

Protection diodes protect all the driver inputs against electrostatic discharge. The driver and enable inputs (DI and EN) are compatible with LVTTTL and LVCMOS devices. Differential outputs have the same V_{OD} (\geq 2V) ensure as the 5V version. The outputs have enhanced ESD Protection providing greater than 7 kV tolerance.

Connection Diagram

Figure 1. Dual-In-Line Package (Top View)
See Package Number D0016A

TRUTH TABLE⁽¹⁾

Enables	Input	Outputs	
EN	DI	DO+	DO-
L	X	Z	Z
H	H	H	L
H	L	L	H

- (1) L = Low logic state
X = Irrelevant
H = High logic state
Z = TRI-STATE

Please be aware that an important notice concerning availability, standard warranty, and use in critical applications of Texas Instruments semiconductor products and disclaimers thereto appears at the end of this data sheet.

These devices have limited built-in ESD protection. The leads should be shorted together or the device placed in conductive foam during storage or handling to prevent electrostatic damage to the MOS gates.

ABSOLUTE MAXIMUM RATINGS⁽¹⁾⁽²⁾

Supply Voltage (V_{CC})		-0.5V to +7V
Enable Input Voltage (EN)		-0.5V to $V_{CC} + 0.5V$
Driver Input Voltage (D_i)		-0.5V to $V_{CC} + 0.5V$
Clamp Diode Current		± 20 mA
DC Output Current, per pin		± 150 mA
Driver Output Voltage	(Power Off: DO+, DO-)	-0.5V to +7V
Maximum Package Power Dissipation @+25°C	D Package	1226 mW
Derate D Package		9.8 mW/°C above +25°C
Storage Temperature Range		-65°C to +150°C
Lead Temperature Range (Soldering, 4 sec.)		+260°C
ESD Ratings (HBM, 1.5k, 100 pF)	Driver Outputs	≥ 7 kV
	Other Pins	≥ 2.5 kV

- (1) If Military/Aerospace specified devices are required, please contact the Texas Instruments Sales Office/ Distributors for availability and specifications.
- (2) Absolute Maximum Ratings are those values beyond which the safety of the device cannot be ensured. They are not meant to imply that the device should be operated at these limits. The table of [Electrical Characteristics](#) specifies conditions of device operation.

RECOMMENDED OPERATING CONDITIONS

		Min	Typ	Max	Units
Supply Voltage (V_{CC})		3.0	3.3	3.6	V
Operating Free Air	Temperature Range (T_A) DS34LV87T	-40	25	+85	°C
Input Rise and Fall Time				500	ns

ELECTRICAL CHARACTERISTICS⁽¹⁾⁽²⁾

Over Supply Voltage and Operating Temperature ranges, unless otherwise specified

Symbol	Parameter	Conditions	Pin	Min	Typ	Max	Units	
V _{OD1}	Output Differential Voltage	R _L = ∞, (No Load)	DO+, DO-		3.3	4.0	V	
V _{OD2}	Output Differential Voltage	R _L = 100Ω See Figure 2		2	2.6		V	
ΔV _{OD2}	Change in Magnitude of Output Differential Voltage			-400	7	400	mV	
V _{OD3}	Output Differential Voltage	R _L = 3900Ω (V.11), See Figure 2⁽³⁾			3.2	3.5	V	
V _{OC}	Common Mode Voltage	R _L = 100Ω See Figure 2			1.5	2	V	
ΔV _{OC}	Change in Magnitude of Common Mode Voltage			-400	6	400	mV	
I _{OZ}	TRI-STATE Leakage Current	V _{OUT} = V _{CC} or GND Drivers Disabled			±0.5	±20	μA	
I _{SC}	Output Short Circuit Current	V _{OUT} = 0V V _{IN} = V _{CC} or GND ⁽⁴⁾			-40	-70	-150	mA
I _{OFF}	Output Leakage Current	V _{CC} = 0V, V _{OUT} = 3V			0.03	100	μA	
		V _{CC} = 0V, V _{OUT} = -0.25V			-0.08	-100	μA	
V _{IH}	High Level Input Voltage		DI, EN	2.0		V _{CC}	V	
V _{IL}	Low Level Input Voltage			GND		0.8	V	
I _{IH}	High Level Input Current	V _{IN} = V _{CC}				10	μA	
I _{IL}	Low Level Input Current	V _{IN} = GND			-10		μA	
V _{CL}	Input Clamp Voltage	I _{IN} = -18 mA					-1.5	V
I _{CC}	Power Supply Current	No Load, V _{IN} (all) = V _{CC} or GND		V _{CC}			100	μA

- (1) Current into device pins is defined as positive. Current out of device pins is defined as negative. All voltages are referenced to ground except differential voltages V_{OD1}, V_{OD2}, V_{OD3}.
- (2) All typical values are given for V_{CC} = 3.3V and T_A = +25°C.
- (3) This specification limit is for compliance with TIA/EIA-422-B and ITU-T V.11.
- (4) Only one output shorted at a time. The output (true or complement) is configured High.

SWITCHING CHARACTERISTICS⁽¹⁾⁽²⁾

Over Supply Voltage and Operating Temperature ranges, unless otherwise specified

Symbol	Parameter	Conditions	Min	Typ	Max	Units
t_{PHLD}	Differential Propagation Delay High to Low	$R_L = 100\Omega$, $C_L = 50\text{ pF}$ See Figure 3 and Figure 4	6	10.5	16	ns
t_{PLHD}	Differential Propagation Delay Low to High		6	11	16	ns
t_{SKD}	Differential Skew $ t_{PHLD} - t_{PLHD} $			0.5	2.0	ns
t_{SK1}	Skew, Pin to Pin (same device)			1.0	2.0	ns
t_{SK2}	Skew, Part to Part ⁽³⁾			3.0	5.0	ns
t_{TLH}	Differential Transition Time Low to High (20% to 80%)			4.2	10	ns
t_{THL}	Differential Transition Time High to Low (80% to 20%)			4.7	10	ns
t_{PHZ}	Disable Time High to Z	See Figure 5 and Figure 6		12	20	ns
t_{PLZ}	Disable Time Low to Z			9	20	ns
t_{PZH}	Enable Time Z to High			22	32	ns
t_{PZL}	Enable Time Z to Low			22	32	ns
f_{MAX}	Maximum Operating Frequency ⁽⁴⁾			32		MHz

(1) $f = 1\text{ MHz}$, t_r and $t_f \leq 6\text{ ns}$ (10% to 90%).

(2) See TIA/EIA-422-B specifications for exact test conditions.

(3) Devices are at the same V_{CC} and within 5°C within the operating temperature range.

(4) All channels switching, output duty cycle criteria is 40%/60% measured at 50%. This parameter is ensured by design and characterization.

PARAMETER MEASUREMENT INFORMATION

Figure 2. Differential Driver DC Test Circuit

Figure 3. Differential Driver Propagation Delay and Transition Time Test Circuit

Generator waveform for all tests unless otherwise specified: $f = 1 \text{ MHz}$, Duty Cycle = 50%, $Z_o = 50\Omega$, $t_r \leq 10 \text{ ns}$, $t_f \leq 10 \text{ ns}$.

C_L includes probe and fixture capacitance.

TYPICAL APPLICATION INFORMATION

General application guidelines and hints for differential drivers and receivers may be found in the following application notes:

- Transmission Line Drivers and Receivers for TIA/EIA Standards RS-422 and RS-423(SNLA137)
- A Comparison of Differential Termination Techniques(SNLA304)

Power Decoupling Recommendations:

Bypass caps must be used on power pins. High frequency ceramic (surface mount is recommended) 0.1 μF in parallel with 0.01 μF at the power supply pin. A 10 μF or greater tantalum or electrolytic should be connected at the power entry point on the printed circuit board.

(1) The marketing status values are defined as follows:

ACTIVE: Product device recommended for new designs.

LIFEBUY: TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.

NRND: Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.

PREVIEW: Device has been announced but is not in production. Samples may or may not be available.

OBSELETE: TI has discontinued the production of the device.

(2) Eco Plan - The planned eco-friendly classification: Pb-Free (RoHS), Pb-Free (RoHS Exempt), or Green (RoHS & no Sb/Br) - please check <http://www.ti.com/productcontent> for the latest availability information and additional product content details.

TBD: The Pb-Free/Green conversion plan has not been defined.

Pb-Free (RoHS): TI's terms "Lead-Free" or "Pb-Free" mean semiconductor products that are compatible with the current RoHS requirements for all 6 substances, including the requirement that lead not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, TI Pb-Free products are suitable for use in specified lead-free processes.

Pb-Free (RoHS Exempt): This component has a RoHS exemption for either 1) lead-based flip-chip solder bumps used between the die and package, or 2) lead-based die adhesive used between the die and leadframe. The component is otherwise considered Pb-Free (RoHS compatible) as defined above.

Green (RoHS & no Sb/Br): TI defines "Green" to mean Pb-Free (RoHS compatible), and free of Bromine (Br) and Antimony (Sb) based flame retardants (Br or Sb do not exceed 0.1% by weight in homogeneous material)

(3) MSL, Peak Temp. -- The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

(4) Multiple Top-Side Markings will be inside parentheses. Only one Top-Side Marking contained in parentheses and separated by a "~" will appear on a device. If a line is indented then it is a continuation of the previous line and the two combined represent the entire Top-Side Marking for that device.

Important Information and Disclaimer: The information provided on this page represents TI's knowledge and belief as of the date that it is provided. TI bases its knowledge and belief on information provided by third parties, and makes no representation or warranty as to the accuracy of such information. Efforts are underway to better integrate information from third parties. TI has taken and continues to take reasonable steps to provide representative and accurate information but may not have conducted destructive testing or chemical analysis on incoming materials and chemicals. TI and TI suppliers consider certain information to be proprietary, and thus CAS numbers and other limited information may not be available for release.

In no event shall TI's liability arising out of such information exceed the total purchase price of the TI part(s) at issue in this document sold by TI to Customer on an annual basis.

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, enhancements, improvements and other changes to its semiconductor products and services per JESD46, latest issue, and to discontinue any product or service per JESD48, latest issue. Buyers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All semiconductor products (also referred to herein as "components") are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its components to the specifications applicable at the time of sale, in accordance with the warranty in TI's terms and conditions of sale of semiconductor products. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by applicable law, testing of all parameters of each component is not necessarily performed.

TI assumes no liability for applications assistance or the design of Buyers' products. Buyers are responsible for their products and applications using TI components. To minimize the risks associated with Buyers' products and applications, Buyers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any patent right, copyright, mask work right, or other intellectual property right relating to any combination, machine, or process in which TI components or services are used. Information published by TI regarding third-party products or services does not constitute a license to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of significant portions of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI components or services with statements different from or beyond the parameters stated by TI for that component or service voids all express and any implied warranties for the associated TI component or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

Buyer acknowledges and agrees that it is solely responsible for compliance with all legal, regulatory and safety-related requirements concerning its products, and any use of TI components in its applications, notwithstanding any applications-related information or support that may be provided by TI. Buyer represents and agrees that it has all the necessary expertise to create and implement safeguards which anticipate dangerous consequences of failures, monitor failures and their consequences, lessen the likelihood of failures that might cause harm and take appropriate remedial actions. Buyer will fully indemnify TI and its representatives against any damages arising out of the use of any TI components in safety-critical applications.

In some cases, TI components may be promoted specifically to facilitate safety-related applications. With such components, TI's goal is to help enable customers to design and create their own end-product solutions that meet applicable functional safety standards and requirements. Nonetheless, such components are subject to these terms.

No TI components are authorized for use in FDA Class III (or similar life-critical medical equipment) unless authorized officers of the parties have executed a special agreement specifically governing such use.

Only those TI components which TI has specifically designated as military grade or "enhanced plastic" are designed and intended for use in military/aerospace applications or environments. Buyer acknowledges and agrees that any military or aerospace use of TI components which have **not** been so designated is solely at the Buyer's risk, and that Buyer is solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI has specifically designated certain components as meeting ISO/TS16949 requirements, mainly for automotive use. In any case of use of non-designated products, TI will not be responsible for any failure to meet ISO/TS16949.
