

LM715

LM715 High Speed Operational Amplifier

Literature Number: SNOS373A

LM715

High Speed Operational Amplifier

General Description

The LM715 is a high speed, high gain, monolithic operational amplifier intended for use in a wide range of applications where fast signal acquisition or wide bandwidth is required. The LM715 features fast settling time, high slew rate, low offsets, and high output swing for large signal applications. In addition, the device displays excellent temperature stability and will operate over a wide range of supply voltages.

Features

- High slew rate— 100 V/ μ s (Inverting, $A_V = 1$) typically
- Fast settling time— 800 ns typically
- Wide bandwidth— 65 MHz typically
- Wide operating supply range
- Wide input voltage ranges

Applications

- Video amplifiers
- Active filters
- High speed data conversion

Ordering Information

Device Code	Package Code	Package Description
LM715MH	H10C	Metal
LM715CH	H10C	Metal
LM715MJ	J14A	Ceramic DIP
LM715CJ	J14A	Ceramic DIP

Absolute Maximum Ratings

If Military/Aerospace specified devices are required, please contact the National Semiconductor Sales Office/Distributors for availability and specifications.

Storage Temperature Range	-65°C to +175°C
Operating Temperature Range	
Extended (LM715M)	-55°C to +125°C
Commercial (LM715C)	0°C to +70°C
Lead Temperature	
Metal Can and Ceramic DIP	
(Soldering, 60 sec.)	300°C

Internal Power Dissipation (Notes 1, 2)

10L-Metal Can	1.07W
14L-Ceramic DIP	1.36W
Supply Voltage	±18V
Differential Input Voltage	±5V
Input Voltage (Note 3)	±15V

LM715M and LM715C

Electrical Characteristics $T_A = 25^\circ\text{C}$, $V_{CC} = \pm 15\text{V}$, unless otherwise specified

Symbol	Parameter	Conditions	LM715M			LM715C			Units
			Min	Typ	Max	Min	Typ	Max	
V_{IO}	Input Offset Voltage	$R_S \leq 10\text{ k}\Omega$		2.0	5.0		2.0	7.5	mV
I_{IO}	Input Offset Current			70	250		70	250	nA
I_{IB}	Input Bias Current			400	750		400	1500	nA
Z_I	Input Impedance			1.0			1.0		M Ω
R_O	Output Resistance			75			75		Ω
I_{CC}	Supply Current			5.5	7.0		5.5	10	mA
P_C	Power Consumption			165	210		165	300	mW
V_{IR}	Input Voltage Range		±10	±12		±10	±12		V
A_{VS}	Large Signal Voltage Gain	$R_L \geq 2.0\text{ k}\Omega$, $V_O = \pm 10\text{V}$	15	30		10	30		V/mV
V	Settling Time	$V_O = \pm 5.0\text{V}$, $A_V = 1.0$		800			800		ns
TR	Transient Response	Rise Time		30	60		30	75	ns
		Overshoot		25	40		25	50	%
SR	Slew Rate	$A_V = 100$		70			70		V/ μs
		$A_V = 10$		38			38		
		$A_V = 1.0$ (Non-Inverting)	15	18		10	18		
		$A_V = 1.0$ (Inverting)		100			100		

The following specifications apply over the range of $-55^\circ\text{C} \leq T_A \leq +125^\circ\text{C}$ for the LM715M, and $0^\circ\text{C} \leq T_A \leq +70^\circ\text{C}$ for the LM715C

Symbol	Parameter	Conditions	LM715M			LM715C			Units
			Min	Typ	Max	Min	Typ	Max	
V_{IO}	Input Offset Voltage	$R_S \leq 10\text{ k}\Omega$			7.5			10	mV
I_{IO}	Input Offset Current	$T_A = T_{A\text{ Max}}$			250			250	nA
		$T_A = T_{A\text{ Min}}$			800			750	
I_{IB}	Input Bias Current	$T_A = T_{A\text{ Max}}$			0.75			1.5	μA
		$T_A = T_{A\text{ Min}}$			4.0			7.5	
CMR	Common Mode Rejection	$R_S \leq 10\text{ k}\Omega$	74	92		74 (Note 4)	92 (Note 4)		dB
PSRR	Power Supply Rejection Ratio	$R_S \leq 10\text{ k}\Omega$		45	300		45 (Note 4)	400 (Note 4)	$\mu\text{V}/\text{V}$
A_{VS}	Large Signal Voltage Gain	$R_L \geq 2.0\text{ k}\Omega$, $V_O = \pm 10\text{V}$	10			8			V/mV
V_{OP}	Output Voltage Swing	$R_L = 2.0\text{ k}\Omega$	±10	±13		±10	±13		V

Note 1: $T_{J\text{ Max}} = 175^\circ\text{C}$.

Note 2: Ratings apply to ambient temperature at 25°C . Above this temperature, derate the 10L-Metal Can at $7.1\text{ mW}/^\circ\text{C}$, and the 14L-Ceramic DIP at $9.1\text{ mW}/^\circ\text{C}$.

Note 3: For supply voltages less than $\pm 15\text{V}$, the absolute maximum input voltage is equal to the supply voltage.

Note 4: $T_A = 25^\circ\text{C}$ only.

Typical Performance Characteristics for LM715M and LM715C

Note 1: See "Non-Inverting Compensation Components Value Table" for Closed Loop Gain values.

Applications Information

Non-Inverting Compensation Components Values

Closed Loop Gain	C1	C2	C3
1000	10 pF		
100	50 pF		250 pF
10 (Note)	100 pF	500 pF	1000 pF
1	500 pF	2000 pF	1000 pF

Note: For gain 10, compensation may be simplified by removing C2, C3 and adding a 200 pF capacitor (C4) between Lead 7 and 10.

Frequency Compensation Circuit

Suggested Values of Compensation Capacitors vs Closed Loop Voltage Gain

TL/H/10059-10

Layout Instructions

Layout—The layout should be such that stray capacitance is minimal.

Supplies—The supplies should be adequately bypassed. Used of 0.1 μF high quality ceramic capacitors is recommended.

Note: All lead numbers on this page apply to metal package.

Ringing—Excessive ringing (long acquisition time) may occur with large capacitive loads. This may be reduced by isolating the capacitive load with a resistance of 100 Ω . Large source resistances may also give rise to the same problem and this may be decreased by the addition of a capacitance across the feedback resistance. A value of around 50 pF for unity gain configuration and around 3.0 pF for gain 10 should be adequate.

Latch Up—This may occur when the amplifier is used as a voltage follower. The inclusion of a diode between leads 6 and 2 with the cathode toward lead 2 is the recommended preventive measure.

LIFE SUPPORT POLICY

NATIONAL'S PRODUCTS ARE NOT AUTHORIZED FOR USE AS CRITICAL COMPONENTS IN LIFE SUPPORT DEVICES OR SYSTEMS WITHOUT THE EXPRESS WRITTEN APPROVAL OF THE PRESIDENT OF NATIONAL SEMICONDUCTOR CORPORATION. As used herein:

1. Life support devices or systems are devices or systems which, (a) are intended for surgical implant into the body, or (b) support or sustain life, and whose failure to perform, when properly used in accordance with instructions for use provided in the labeling, can be reasonably expected to result in a significant injury to the user.
2. A critical component is any component of a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or system, or to affect its safety or effectiveness.

National does not assume any responsibility for use of any circuitry described, no circuit patent licenses are implied and National reserves the right at any time without notice to change said circuitry and specifications.

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice. Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

TI assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using TI components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any TI patent right, copyright, mask work right, or other TI intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information published by TI regarding third-party products or services does not constitute a license from TI to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. Reproduction of this information with alteration is an unfair and deceptive business practice. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and any implied warranties for the associated TI product or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

TI products are not authorized for use in safety-critical applications (such as life support) where a failure of the TI product would reasonably be expected to cause severe personal injury or death, unless officers of the parties have executed an agreement specifically governing such use. Buyers represent that they have all necessary expertise in the safety and regulatory ramifications of their applications, and acknowledge and agree that they are solely responsible for all legal, regulatory and safety-related requirements concerning their products and any use of TI products in such safety-critical applications, notwithstanding any applications-related information or support that may be provided by TI. Further, Buyers must fully indemnify TI and its representatives against any damages arising out of the use of TI products in such safety-critical applications.

TI products are neither designed nor intended for use in military/aerospace applications or environments unless the TI products are specifically designated by TI as military-grade or "enhanced plastic." Only products designated by TI as military-grade meet military specifications. Buyers acknowledge and agree that any such use of TI products which TI has not designated as military-grade is solely at the Buyer's risk, and that they are solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI products are neither designed nor intended for use in automotive applications or environments unless the specific TI products are designated by TI as compliant with ISO/TS 16949 requirements. Buyers acknowledge and agree that, if they use any non-designated products in automotive applications, TI will not be responsible for any failure to meet such requirements.
